

Petroleum Geology and Geophysics in the 21st Century

Prof. Nikolay P. Zapivalov

Prof. Nikolay P. Zapivalov

Petroleum

Geology and Geophysics in the 21st Century

◆
**A compendium of scientific works published
in DEW Journal over thirteen years**

Petroleum Geology and Geophysics in the 21st Century

Prof. Nikolay P. Zapivalov

Contents of the Book

Section 1. Geology

1. Petroleum Geology of the 21st Century: Theory and Practice
2. Exploring exploration : new paradigms
3. New trends in petroleum geology
4. Dynamics of Oilfield Activity
5. New geo-fluid dynamics method for mapping active fluids in oil-and-gas saturated strata
6. Whether there can be an equilibrium in global power?
7. Metasomatic nano-dolomitization is a new trend in stimulation of petroleum reservoirs

Section 2. Oil Recovery

8. Technology to develop oil and gas fields - New approaches
9. Improved oil recovery – new ideas and technologies in Russia and other countries.
10. Rehabilitation cycles in nonlinear dynamics of petroleum fields
11. Nonlinear characteristics of the productivity of the strained deformed petroliferous stratum-collector
12. New nanotechnology of the formation of high productive petroliferous strata on base of the induced ion change by metasomatic dolomitization
13. Energy of deep layers of the earth. Is it necessary to drill super deep wells?
14. Hydrodynamics processes in near well zone and their influence on well productivity, oil recovery and electrologging properties of Strata
15. Rehabilitation of Exhausted Oil Fields

Section 3. Offshore

16. Offshore oil and ecology
17. Offshore oil and gas in different basins and countries of the world

Section 4. India

18. The glorious past and a bright future
19. 50th anniversary of Soviet-Indian petroleum collaboration
20. New way to big oil for India
21. Saga of Oil in India – From Past to Future

Section 5. Russia

22. Hydrocarbon deposits in the Paleozoic rocks in the south-eastern part of the west-Siberian province
23. Migration behavior during late Jurassic oil deposit formation in Kaymisovsk Arch, West Siberia
24. Petroleum Industry of Russia: the past, present and future
25. Russian Oil and Gas Phenomenon in the beginning of the 21st Century
26. Oil and Gas in the Basement of West Siberia

Section 6. Fractals, Nanotechnologies, Geofluid Dynamics

27. Fractals modeling of petroleum reservoirs
28. Fractons in seismic survey of petroliferous strata
29. The laser photocatalysis of subatomic reactions in the hydrogen energetic technologies
30. A new concept for studying and developing oil and gas pools (a fractal aspect)
31. Fluidodynamic models for petroleum reservoirs

Conclusion
